

**AAPA Membership Chair Report — ExComm Meeting, 3/27/19 (amended 4/2/19)  
Prepared by Lisa Sattenspiel**

**1. Membership Numbers/Trends.** Membership over the last several years is as follows:

<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>	<b>2019 (as of 3/18/19)</b>
1457	1563	1950	2271	2263	2254	1936

Last year at the time of our annual meeting we had 1680 members. The total membership number at the present time (i.e., for the 2019 calendar year) is 1936, substantially above last year, especially since the meeting is several weeks earlier than last year. These members include 201 males, 612 females, 13 who designated other categories (some also indicated male or female), and 1115 who did not report their gender. The breakdown by category of membership for those reporting is as follows:

<b>Membership type</b>	<b>Male</b>	<b>Female</b>	<b>Transgender</b>	<b>Other</b>
<b>Life</b>	18	29	0	0
<b>Regular</b>	74	145	1	0
<b>Special</b>	2	11	0	0
<b>Student</b>	71	361	5	7
<b>Student-Developing</b>	2	6	0	0
<b>Regular-Contingent/Postdoc</b>	15	36	0	0
<b>Special-Contingent/Postdoc</b>	4	8	0	0
<b>Special-Developing</b>	1	0	0	0
<b>Regular-Developing</b>	8	7	0	0
<b>Regular-Spouse</b>	1	2	0	0
<b>Retired</b>	5	7	0	0
<b>Total</b>	<b>201</b>	<b>612</b>	<b>6</b>	<b>7</b>

In the last year, a total of 455 new members have joined the association, although some of these members were previous members who let their membership lapse. These new members include 300 females, 79 males, and 76 who did not report their gender. Students were by far the most common category of new members (n=332), and 37% of them were undergraduates, 57% were graduate students, and 6% were post-undergraduate or BA/MA students.

Our dealings with the management company (BAI) continue to run smoothly and are responsible in part for the recent increase in our membership. With their help we are better able to ensure that members renew each year and we are also able to get regular updates and Newsletters out to the membership to let them know about important issues associated with their memberships.

**2. Membership Category Changes.** One change was made to the membership category structure: a new Special Member Contingent category was designated for members who do not qualify for regular membership and also have financial constraints. This change allows the same small reduction in fees for this category as was implemented for Regular members, a decision deemed reasonable since a significant proportion of the special members are individuals with Master's degrees who are working in the field of anthropology but do not yet qualify for regular membership.

The wording related to the different membership categories was also clarified and updated on the Association's web site and membership forms to better reflect recent changes in membership categories and fees.

**3. Developing Country Rate for Special Members.** An issue came up with an applicant from a developing country who applied for regular membership but was not qualified for such (the applicant had no advanced degrees and insufficient professional experience). Prior to the ExComm meeting the membership chair and the president-elect were under the impression that we were not offering a developing country discount for special members. This question had been discussed in the past, but given our recent changes in the rate structure, it was felt that it was time to revisit the issue. The ExComm approved adding this discount, which ended up being a reaffirmation of a previous decision, as the membership chair discovered after the meeting that the discount was just omitted from the membership category descriptions but was already being provided.

**3. Membership Applicants.** Between March 19, 2018 and March 18, 2019, a total of 455 people applied and were provisionally approved as new members and an additional 125 applied and were provisionally approved to transition to new membership categories. The new member applicants include 71 regular members (including 10 members from developing countries), 23 regular-contingent members, 20 special members (including 2 developing country special member), 10 special-contingent members, and 332 student members (including 13 developing country student members). The transitions include Regular to Student (3), Special to Regular-Contingent (1), Special to Student (4), Special-Developing to Regular-Developing (1), Student to Regular (32), Student to Regular-Contingent (40), Student to Special (3), Student to Special-contingent (3), and Student-Developing to Regular-Developing (2). An additional 36 members requested transitions that do not need to be voted on (e.g., Regular-Contingent to Regular or Regular to Retired) and have not been included in the list below.

As we observed last year, some new applicants had been approved previously for membership but had let their membership lapse for multiple years. The number of such applicants is relatively small, but if non-payment extended more than five years, these individuals were treated as new member applicants and appear on our approval lists below.

Credentials for membership of new applicants for Regular and Special member categories were verified by researching the applicants online, reviewing CVs/qualifications, and/or soliciting reference letters. The approval process for new applicants for Student membership involved the additional step of confirming student status with an advisor or faculty member in their department.

The names of the new and transitioning applicants who applied and were provisionally approved between March 19, 2018 and March 18, 2019 and for whom a vote of the membership is required are listed below by membership category. A few additional people who applied prior to March 19, 2018 may not have appeared on last year's list and have been included here. The first section represents new members and the second section has the names of members transitioning between categories.
