

## **AABA Student Liaison Annual Report, 2025-2026**

Abigail Houkes

AABA Executive Committee meeting

prepared on March 3rd, 2026

This year's efforts focused primarily on building administrative infrastructure to support the long-term continuity and effectiveness of the Student Liaison role.

An official Student Liaison email account was established to centralize communications and ensure consistent access across transitions in leadership. Supporting documentation was also developed and added to the shared drive, outlining role expectations, key contacts, recurring events, and future initiatives. These materials are intended to provide incoming student liaisons with a clear foundation and reduce the learning curve associated with the position.

The registration waiver raffle, held during the annual business meeting, will continue in 2026. Students who attend the meeting in its entirety will be eligible for a drawing to have their registration fees waived for the following year's conference.

Finally, work has begun on a student needs survey aimed at better understanding the priorities and interests of the student membership. The survey will gather input on preferred programming, including coffee hours, professional development workshops, and other events, to help ensure that future initiatives are responsive to student interests.
